Profile

UI/UX Engineer with over eighteen years of experience. Versatile professional with experience ranging from large corporate endeavors to smaller, startup-based projects.

I love cars, the outdoors and gaming (when I have time). I'm always looking at details in everyday situations and seeing how I can use them creatively as a design/theme.

Skills

HTML 5
CSS 3.0
Bootstrap 4.3
Responsive Design

Work

Brightstar

Feb 2017 to Present

Senior UI/UX Engineer **Brightstar (Alpharetta, GA)**

Manage a small team responsible for UX standards and appearance.

Aided in the design of the new mobile application and did all of the front end code. (Xamarin-Xaml)

Applied a UI refresh on the core web application to make it easier to read and more modern.

Trained and worked with most of the devs on front end standards, responsive design and accessibility.

Aug 2014 to Feb 2017

Senior Software UI/UX Engineer **Nextgear Solutions (Alpharetta, GA)**

Updated Enterprise web application with a new UI that increased code reusability and decreased the number of images loaded/used. Customers thought the application ran faster post release and we saw a jump in satisfaction and use.

Redesigned the mobile application using new technology (Xamarin Forms) to increase the user acceptance and ease of use compared to the current mobile application.

Create UI/UX that simplifies and eases product usability while keeping an easy and reusable code base.

Sept 2008 to Aug 2014

Senior Software Engineer **LexisNexis (Boca Raton, FL)**

Worked on a new stand-alone C# web application that was a rewrite to an existing installed application. Worked with a remote team gathering information on what wasn't documented to meet requirements.

Delivered 2 XML/XSLT integration applications used during the merging of products after an acquisition that were released earlier than expected saving hundreds of thousands of dollars.

Implemented designs from our UI department and worked with engineers to span the gap from conception to delivered functionality on new efforts.
